DEPARTMENT OF MANAGEMENT

MOTTO - "CYNOSURE OF INNOVATION THROUGH
KNOWLEDGE AND SKILLS"

*"GENDER EQUALITY IN SCIENCE, TECHNOLOGY AND
INNOVATION: DRIVING SUSTAINABLE FUTURE DURING COVID-19
AND BEYOND"*

Our world will never be the same after COVID-19 and we need to make sure it is better. We, local and regional leaders, are fully committed to lead the transformation from the bottom up. As identified in our UCLG Decalogue for the Post COVID-19 era, we know well that the sacrifices that are being asked from this and future generations need to lead to more just and equality-driven societies, where we take care of each other, care is valued and where everyone has the same rights and opportunities.

Gender equality was already taken up as a priority area for local and regional government networks and their members before the coronavirus crisis hit. Gender equality is not an ideal but a necessity which we, local and regional women elected officials, are committed to defend and promote for the benefit of our democracies and societies for everyone and everywhere. It is clear that health emergencies do not impact men and women in the same way and this simple acknowledgment will be critical to overcoming this and future pandemics. Empowered and safer women and children will lead to resilient and safer societies. Amplified women's voices of all generations can set the pathway towards generation equality where women's leadership is no longer an exception but the norm. Step forward to ensure that we take decisive steps to protect and empower women and girls everywhere from gender-based violence, in particular in relation to domestic violence risk situations.
